

Unicast Grizzly Panels

Cast for Strength and Durability

Unicast Grizzly Panels are cast using one-step, high intensity molding methods for superior dependability. The cast panels improve grizzly bar stability and eliminate the need to weld repair cracks caused by impact and vibration.

Typical 2' X 5' panel

Modular for Convenience

Tapered Grizzly Panels

One-panel piece cast in a Unicast proprietary martensitic alloy steel at 400 Brinnel hardness outlasts traditional rolled carbon steel fabricated panels 2:1.

Self-Cleaning: Full length and height of the bars are tapered to provide optimum material flow and eliminate blockage.

Modular construction for easy replacement of 24" panels.

Predrilled holes for easy assembly.

Five-foot grizzly panels are **always in stock**. Two-week deliveries.

Now available in heavy duty 9 bar.

Typical 3' X 10'5" panel

Built in Any Size

Honeycomb Grizzly Panels

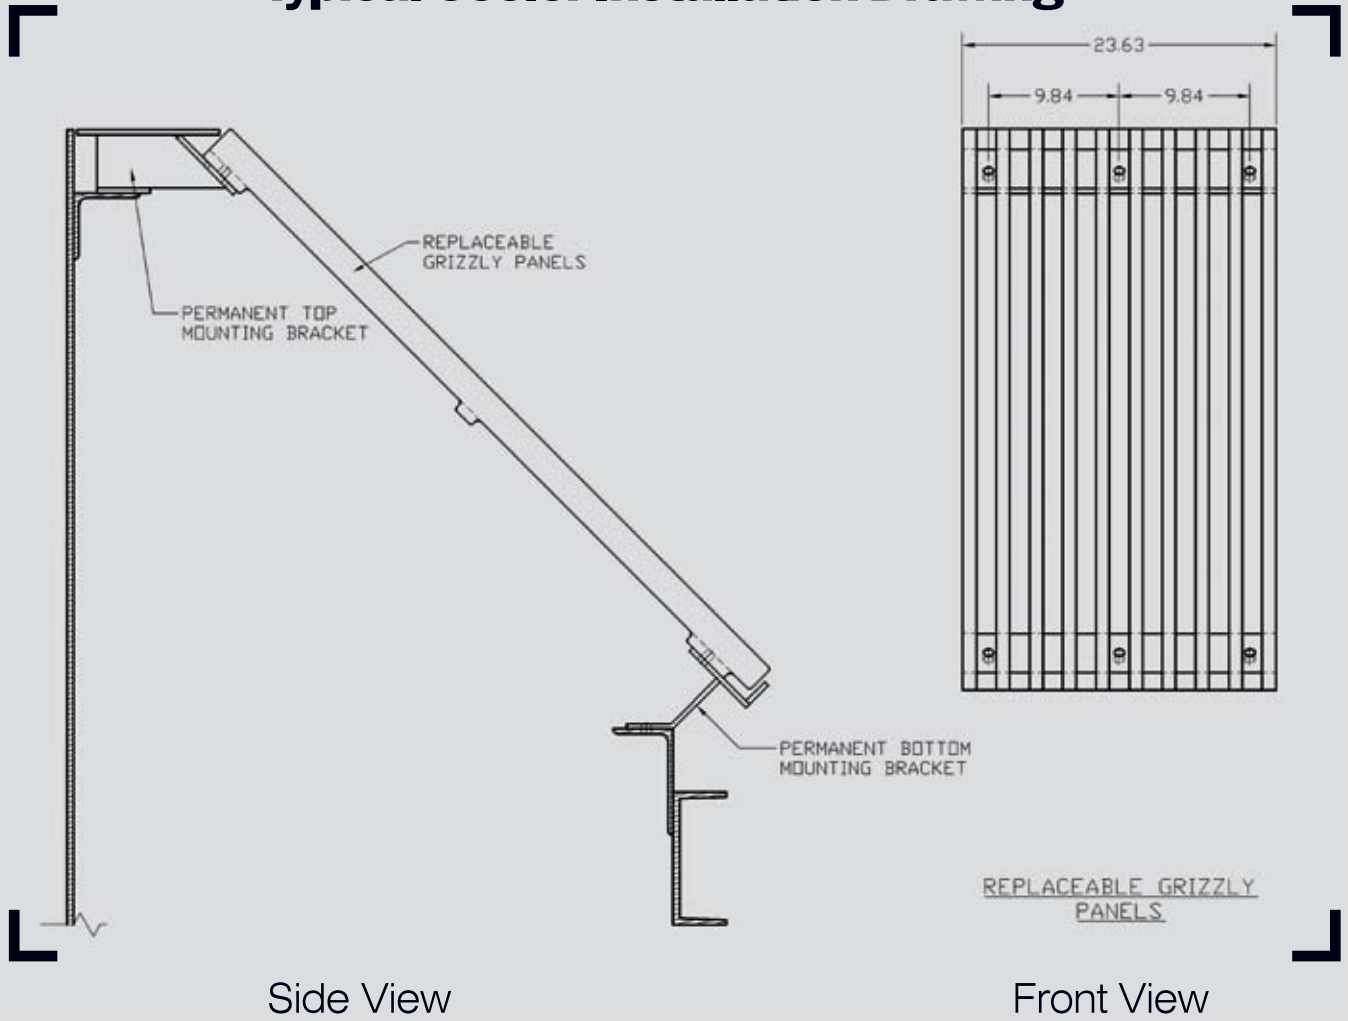

One-panel piece: High-strength cast manganese panels are available for extreme impact applications.

Self-Cleaning: Tapered vertically to allow good material flow.

Predrilled holes for easy assembly.

Custom built: Panels built in any size to suit your specific needs.
