

Unicast Ceramic-Lined Slurry Valve (CLV) Completely Lined for Increased Wearlife

The Ceramic-Lined Valve (CLV) is a recent Unicast innovation designed specifically for the transport of slurry. Industry-wide problems of leakage and short wearlife are eliminated.

Ceramic Liners Extend Wearlife:

The valve body and outlet—the high wear zones—are lined with a 1"-thick cast ABSC20 shield for maximum durability. Inlets are lined with one-piece ½"-thick ceramic sleeves. **Toughness where you need it** for longest wear life. Unique to Unicast slurry valves

Rubber-Coated Drive Arm:

Rubber coating provides an **abrasion-resistant shield** ensuring longest wearlife

Delta Wing for Control: Ensures exact positioning of the lever in manual configurations for **maximum operator control**. Adapts electric gear motor as well as hydraulic and pneumatic actuators--1 multipurpose lever for **3 different configurations**

Here's how:

Precision-Aligned Gate Eliminates Leakage: Precision alignment between the gate and seat for a perfect seal. **Clean-cut transition** of the gate between inlets eliminates leakage and damage

Streamlined One-Piece Seat: Sandwiched between upper and lower housing with exact flange diameter to eliminate turbulence and cavitation of high abrasive conditions
