

## **Chute Liners**

*Unicast Chute Liners protect your system by lining the chute with a perfect-fit cast material that's more cost effective than fabricated steel plate.*

---

Unicast Chute Liners are popular across mining, cement, oil and gas, aggregate, and coal industries. The key advantage over fabricated steel plate liners is the fact that our chute liners are cast, which lowers manufacturing costs. Cast chute liners are more cost-effective than fabricated alternatives. Our benefits of casting include great durability, custom designs at a lower cost than fabricated steel plate, and a variety of material options with thicknesses and styles to best fit the application.
