

Clinker Breaker Hammers

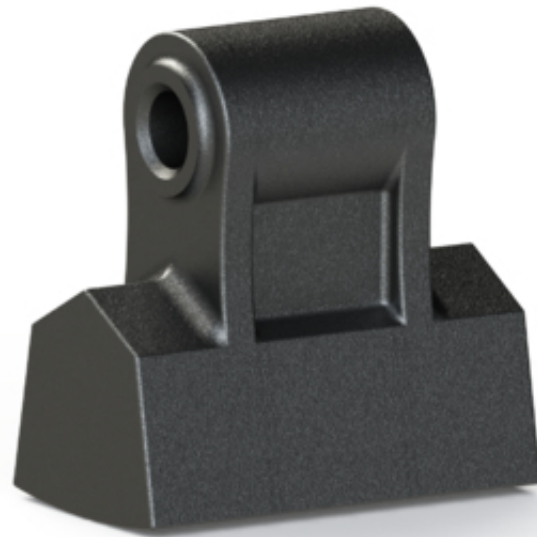

Unicast Cooler clinker breaker hammers are engineered to avoid brittleness and maintain balance.

CLINKER BREAKER HAMMERS FOR COOLERS

Made in a manganese steel with controlled carbon-manganese ratio for optimum high-temperature impact resistance, Unicast parts avoid the brittleness that can occur when the chrome content is too high. Other material options for titanium carbide, tungsten carbide, and CRA ceramic to suit your application.

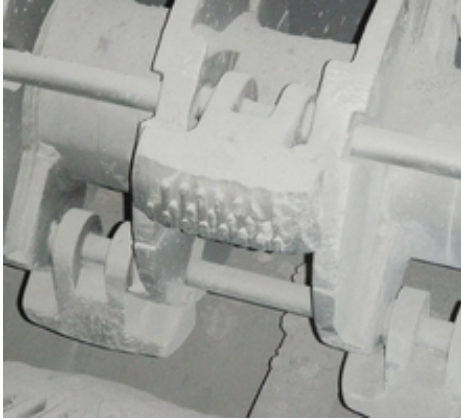

The Unicast V-Mold process ensures a consistent weight that insures proper balance. These and other quality control standards provide our customers with parts they can depend on.

We maintain an inventory of various popular sizes and designs.
